Non-Final Office Action

Acknowledgement is made of the response filed on 3/15/06. Amendments are entered. Claims 1-13 are pending. Claim 13 is withdrawn from consideration as non-elected invention. New rejection is being made, as some references are found relevant in the new IDS filed after the first action.

Response to Remarks

- Since claims are amended rejection under 112 (2) is withdrawn. Arguments regarding the art rejections were fully considered but are not found persuasive therefore, all the rejection is maintained for the same reasons as set forth in our previous office action.
- The basis of the arguments regarding the restriction requirement is that the search for claim 13 will not be a burden on the Examiner. Examiner respectfully disagrees because compounds are not the same as their process of making or isolating. The reference use to reject the process may not be used for the rejection of compounds.
- The process of making the same compound may be different i.e. one compound can be prepared by different processes. The search for a particular compound in specific form will not be the same therefore; it would be a burden on the Examiner to search both the inventions as claimed.
- Examiner notes that Applicants are arguing about the references individually. It had been established by Courts that "One cannot show nonobviousness by **attacking references individually** where the rejections are based on combinations of references." In re Keller, 642 F.2d 413, 208 SPQ 871 (CCPA 1981); In re Merck & Co., Inc., 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). See MPEP 2145.
- No criticality of the invention is disclosed, no improvement if any from the prior art was found. Presently claimed invention is considered *prima facie* obvious over the prior art of record at the time of invention.
- For the reasons cited above and in our previous action rejection over US 2,598,269, US 6,838,104 and US 6,057,462 is maintained.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted

Art Unit: 1616

in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Copending Applications

Applicants must bring to the attention of the examiner, or other Office official involved with the examination of a particular application, information within their knowledge as to other copending United States applications, which are "material to patentability" of the application in question. MPEP 2001.06(b). See *Dayco Products Inc. v. Total Containment Inc.*, 66 USPQ2d 1801 (CA FC 2003).

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
